

# Germany's contribution to fast start financing 2011

(projects and programmes: commitments from 1 January to 31 December 2011)

Beneficiary Country/Region	Thematic Area	Programme or Project Title	Implementation Period	Implementing Agency	Contribution (by million €)	Type (grant / loan)	Short Description of Action
Africa (SADC*)	REDD+*	Development of Integrated Monitoring Systems for REDD+ in the SADC Region	09/2011–02/2015	GIZ*	3.4	Grant	The project intends to set up an integrated system for monitoring forest area, carbon stocks and emissions from deforestation and forest degradation. The system will enhance technical and institutional capacities in selected SADC countries.
Bangladesh	Adaptation	Protection of Biodiversity in Wetlands	Supplementary funds for ongoing project (06/2009–05/2015)	GIZ	4.0	Grant	The project aims to improve the management of wetlands and floodplains with the help of the local population and municipalities. It will establish new protected areas, rehabilitate natural resources, and provide policy advice for improved management. It will also support income-generating measures through the sustainable use of water-saving agricultural production.
Bolivia	REDD+	Strengthening Management and Consolidation of the Protected Areas System	03/2011–02/2014	The Nature Conservancy (TNC)	0.4	Grant	The project's goal is to strengthen the environmental management of protected areas in the Municipality of La Paz through the implementation of protected area management plans. The actions will involve reforestation with native species, studies of aquatic species, education and public awareness, and proper management of watersheds, water resources and environmental services.
Brazil	REDD+	Prevention, Control and Monitoring of Fires in the Brazilian Cerrado	11/2011–10/2014	GIZ, KfW*	8.5	Grant	The project aims at reducing bush fires and maintaining the Cerrado's ecosystem. Foreseen activities include fire prevention and control and the improvement of the monitoring system for deforestation and fires.
Brazil	REDD+	Combating Deforestation in Pará	starting 2014	KfW	12.5	Grant	The programme aims at protecting biodiversity and forests in the state of Pará.
Brazil	Adaptation	Promotion of Protected Areas and Sustainable Management	Supplementary funds for ongoing project (01/2010–10/2013)	GIZ	2.0	Grant	The programme will support stakeholders in managing protected areas and primary forests in the Amazon and adapting management approaches. It provides policy support, training and financial support to reduce the rates of deforestation.
Caribbean (Dominican Republic, Haiti, Jamaica)	Mitigation	Designing and Communicating Low Carbon Energy Roadmaps for Small Island States of the Caribbean	02/2011–01/2013	Worldwatch Institute	1.4	Grant	The project goal is to work with different stakeholders to develop low-carbon strategies. The project will include renewable resource assessments and mapping, technical, social and economic assessments, and a policy analysis of potential renewable energy zones and energy efficiency projects.
Caribbean (Belize, Grenada, Guyana, Jamaica, St. Lucia)	Adaptation	Regional Institutions, Adaptation, and Insurance: Expanding Coverage for Medium-Level Weather Extremes in Vulnerable Countries Using Risk Reduction and Innovative Insurance Solutions	03/2011–03/2014	Munich Climate Insurance Initiative (MCII)	2.0	Grant	The project aims to identify solutions for addressing moderate weather-related risks and develop and deliver public safety networks and public-private insurance solutions to at-risk population groups. It will identify how approaches to insurance solutions and disaster risk reduction can be combined in order to achieve sustainable adaptation benefits.
Caucasus (only developing countries)	Adaptation	Focal Area Environment – Component for the Sustainable Management of Biodiversity	09/2011–12/2015	GIZ	13.5	Grant	The programme will help to create conditions for sustainable biodiversity management. It supports the development of guidelines for implementing biodiversity management measures as well as the capacities of the environment ministries. It also promotes organisational and staff development within and outside the environment ministries and environmental communication.
Central Asia (Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan)	Mitigation	Integrated Approaches to the Development of Climate Friendly Economies in Central Asia	05/2011–05/2013	DIW econ GmbH	2.9	Grant	The project aims at supporting Central Asian countries in developing a comprehensive policy framework for mitigating climate change and assisting them in re-orienting their economic development in a low-carbon, climate-friendly way. It will develop a NAMA for each country in cooperation with national experts and provide appropriate advice to governments, elaborate toolkits for climate-friendly development in different sectors, and strengthen the relevant regional networks through capacity-building and technology transfer.
China	Mitigation	Capacity Building to Establish and Develop the Technical and Institutional Infrastructure Required to Achieve the 2020 Goals	03/2011–11/2013	GIZ	2.3	Grant	The project develops capacities to establish a GHG* monitoring system and an emissions trading scheme (ETS) at regional level. This involves sharing international experience as well as supporting the development and evaluation of the technical and infrastructure conditions required to establish a GHG monitoring system and a regional ETS.
China	Mitigation	Sino-German Climate Partnership	02/2011–11/2013	GIZ	2.0	Grant	In January 2009 the governments of China and Germany signed an agreement to cooperate on climate change mitigation. A bilateral working group was established to ensure that this agreement will lead to the development of innovative measures. The project promotes dialogue on policy options and measures for both tackling climate change and adapting to its impacts in China and Germany, and supports the development of bilateral climate change mitigation projects.
Costa Rica	Mitigation	REN@EARTH – Facilitating Clean Energy Knowledge Acquisition (for Students) in the Humid Tropics with a Multiplier Effect	03/2011–12/2013	EARTH University	0.9	Grant	The project's aim is to strengthen the basis for the increased use of renewable energy technologies. The foundation for sustainable added value at local level shall be built by facilitating know-how transfer to students, industry and other stakeholders. The project will implement an overview course on renewable energy at EARTH University as well as evening classes for the interested public, build up a training centre for practical education, support technology-specific further education seminars for engineers in Costa Rican industry, and organise train-the-trainer seminars on various technologies for future EARTH University lecturers.
Costa Rica	Mitigation	Support of Costa Rica's Zero-Emission Development Strategy as Model for Low Carbon Development	11/2011–04/2015	GIZ	3.5	Grant	The project aims at strengthening institutional structures and capacities on various levels, developing NAMAs in selected thematic sectors and implementing pilot measures. It will initiate communication campaigns, formulate specific climate strategies for selected institutions, establish a network of various stakeholders, develop concepts and strategies for low-carbon development in developing and newly-industrialised countries, and disseminate the experiences and lessons learnt in regional and international forums.
Dominican Republic	Mitigation	Fast Track Development of Two Transformative Climate-Compatible Development Plans	03/2011–12/2011	Coalition for Rainforest Nations (CFRN)	1.7	Grant	The project will develop a Climate Compatible Development Plan. Broken down by sector, mitigation options are identified and recommendations for climate-compatible growth are proposed. The project also proposes integrating the results into national policy and disseminates the experiences made at the international level.
Ecuador	Mitigation	Switching from Fossil Fuels to Biofuels on the Galapagos Islands	08/2011–12/2011	GIZ	0.5	Grant	The project aims to support the Ecuadorian Government in switching the Galapagos Islands' energy supply completely to renewable energy sources by 2015. It promotes the substitution of fossil fuels with plant oil that is grown under environmentally and socially acceptable conditions. The project provides advice and scientific support for promoting the use and cultivation of the native <i>Jatropha curcas</i> and its processing into plant oil. Training measures for local actors are also planned, and existing and newly purchased generators are to be converted to run on plant oil.
Ecuador	REDD+	Forest Protection	08/2011–07/2016	KfW	10.0	Grant	The program aims at broadening and consolidating forest protection measures in Ecuador as a part of the national REDD-strategy.
Ecuador	Adaptation	Programme for the Sustainable Management of Natural Resources	Supplementary funds for ongoing project (01/2010–12/2013)	GIZ	1.3	Grant	The programme aims at supporting the rural population in applying sustainable natural resource management strategies and methods to increase their income. It supports the development of institutions and strategies for the conservation of natural resources as well as the local governance of nature conservation and eco-corridors. It fosters the valorisation of natural resources and environmental services, and helps to develop a national framework for REDD+ and adaptation strategies.
Ethiopia and three further countries	Mitigation	Low Carbon Development Plans	08/2011–05/2013	Global Green Growth Institute (GGGI)	5.0	Grant	The project's goal is to increase the number of developing countries demonstrating the feasibility and benefits of a green growth development path. The project will support the assessment of abatement levers in various sectors as well as the development of MRV* systems and the capacity development of the local partners. Experiences and the lessons learnt from all four partner countries will be shared publicly in the form of reports, presentations, workshops and conferences.
Guatemala	REDD+	Preparation of a REDD+ Project for Tropical Forest Protection and Sustainable Community Development in the Sierra del Lacandón National Park in Guatemala	01/2011–12/2014	OroVerde – Die Tropenwaldstiftung	0.9	Grant	The project aims at reducing deforestation and supporting the development of national and international guidelines for the better integration of biodiversity protection and poverty reduction in REDD+ mechanisms. It will involve the local population, advise the national Government and introduce the experiences gained into the debate at the international level.
Guyana	REDD+	Protection of Tropical Forests 3	starting 2013	KfW	4.3	Grant	The programme supports the REDD+ preparation process and sustainable forest management measures.
Honduras	Adaptation	Conservation of Natural Resources, Local Economic Development and Climate Protection	10/2011–12/2013	GIZ	6.0	Grant	The project supplies policy advisory services for environmental and resource management at the national level, and supports the sustainable management of natural resources and the local economic promotion of the country's most important forest regions. It contributes to securing the largest and most important national protected areas, highlighting the relevance of EbA.*
Honduras	Adaptation	Consolidation of the National Protected Areas System (LifeWeb)	starting 2013	KfW	10.0	Grant	This project supports future biodiversity conservation and the long-term provision of ecosystem goods and services through a participatively managed and ecologically representative Honduran National Protected Areas System.
Indonesia	REDD+	Forest and Climate Change	Supplementary funds for ongoing project (02/2009–12/2013)	GIZ	8.6	Grant	The programme is an integral part of the Forests and Climate Change programme and supports biodiversity and sustainable development in the Heart of Borneo. It offers policy advice, strategy development and implementation with special regard to REDD+.
Indonesia	REDD+	Forestry Programme	starting 2013	KfW	23.0	Grant	The programme aims at supporting the development and implementation of strategies for biodiversity and watershed management strategies in the context of the national REDD+ strategy.
Jordan	Mitigation	Improving Energy Efficiency in the Water Sector	02/2011–03/2013	GIZ	1.0	Grant	The project aims to improve energy efficiency in the operation of the water authority's pumps. To achieve this, the potentials for energy saving at the major power users will be identified and measures to improve energy efficiency will be devised.
Laos	REDD+	Sustainable Development and Protection of the Forest in Southern Laos	02/2011–05/2018	KfW	6.0	Grant	The programme aims at reducing the ongoing degradation and illegal clearing of the tropical forests in southern Laos. It will protect the high biodiversity in the region and mitigate the economic loss which affects the local population through logging.
Laos, Vietnam	REDD+	Prevention of Deforestation, Forest Degradation and Leakage Effects in the Border Area of Central Vietnam and in the South of Laos for Long-Term Maintenance of Carbon Sinks and Biodiversity	01/2011–12/2014	KfW	7.0	Grant	The project aims to avoid the large quantities of GHG emissions that would result from deforestation and forest degradation. The project will additionally support the national REDD readiness process in the two countries, albeit with a special focus on Vietnam, through active participation in the national working group responsible for leakage effects.
Laos, Vietnam	REDD+	Advancing Understanding of Forest Carbon Stock Enhancement as Part of REDD+	11/2011–10/2014	Netherlands Development Organisation (SNV)	1.3	Grant	This project aims to advance the understanding of forest carbon stock enhancement as part of future REDD+ agreements through exploring the technical and economic feasibility of different forest carbon stock enhancement strategies in pilot sites.
Maldives	Mitigation	Supporting the Carbon Neutral Strategy of the Maldives	10/2011–09/2014	GIZ	3.1	Grant	The project aims at supporting the Government in the implementation of its Carbon Neutral Strategy so that public bodies and private actors gain the capacity and know-how to elaborate and implement comprehensive strategies. A number of pilot installations of renewable energies and energy efficiency measures will be complemented by the development of a learning and training platform on energy topics.
Mali	Adaptation	Innovative Development Plan for Adaptation to Climate Change in Mali	11/2011–08/2014	GIZ	3.0	Grant	Goal of this project is to tie the topic adaptation to climate change to the decentralisation processes in Mali.
Mauritania	Adaptation	Natural Resources Management Programme	01/2011–12/2013	GIZ	1.5	Grant	The programme aims at improving local and national capacities for the sustainable management of natural resources, contributing to the conservation of Mauritania's ecosystem. It will provide advice on and support the use of (1) natural resources to help alleviate poverty; and (2) the development of approaches for adaptation and mitigation strategies.
MENA*	Mitigation	Supporting the Mediterranean Solar Plan (MSP)	03/2011–02/2014	GIZ	2.9	Grant	The project accelerates the installation and transfer of renewable energy technology and contributes to the implementation and promotion of the Solar Plan of the Union for the Mediterranean. The measures provide direct support for the regional integration of energy systems through commercial renewable energy power plants.
Mexico	Adaptation	Innovative Mechanisms for a Cooperative Climate Change Adaptation Programme in Sierra Madre and the Coast of Chiapas, Mexico	07/2011–12/2014	The Nature Conservancy (TNC)	1.5	Grant	The project's goal is to improve current adaptive capacity in key watersheds. It will design and implement financial mechanisms that enhance action for the EbA to the impacts of climate change in Chiapas.
Morocco	Mitigation	Solar Power Plant Ouarzazate	01/2012–12/2026	KfW	15.0	Grant	The project's goal is to complete the first phase of the planned solar power plant in Ouarzazate. This promotes the efficient, ecologically sound and socially equitable generation of electricity and the introduction to the market of a path-breaking technology for global climate change mitigation. Ouarzazate is the first reference project for large-scale solar thermal power technology, with participation from the European Commission, the European Investment Bank and the Agence Française de Développement.
Namibia	Adaptation	Programme for Integrated National Park Management	01/2013–12/2017	KfW	14.0	Grant	This project supports the Ministry of Environment and Tourism in the establishment and integrated management of national parks in the northern part of the country. It focuses on the maintenance and improvement of the ecological value of the biodiversity-rich areas, and contributes to poverty reduction and the protection of natural habitats and ecosystems.
Namibia	Adaptation	Support to Debushing	starting 2012	GIZ	4.0	Grant	The programme aims at developing viable and appropriate debushing techniques in cooperation with the most affected communities, thus increasing the carrying capacity of Namibian farmland.

Continuation of project list

Beneficiary Country/ Region	Thematic Area	Programme or Project Title	Implementation Period	Implementing Agency	Contribution (by million €)	Type (grant / loan)	Short Description of Action
Namibia	Adaptation	Biodiversity Management and Climate Change	01/2013–12/2020	GIZ	5.0	Grant	The programme aims at supporting the Ministry of Environment and Tourism in strengthening capacity for environmental resource management under changing climatic conditions. It will focus on the development and implementation of environmental policy, capacity development for biodiversity management in selected community protected areas, and the improvement of decision-making on biodiversity and climate change issues.
Namibia	Adaptation	Vocational Training for Agriculture	09/2011–12/2017	GIZ	2.5	Grant	This project supports the Namibian Training Authority in the implementation of a nationally recognised vocational training programme in the agriculture and land management sector, with a focus on enhancing sustainable income generation, food security and support for sustainable land management.
Nepal	Adaptation	Increasing Climate Change Resilience of Vulnerable Communities in Humla and Jumla Districts	02/2011–01/2014	The Mountain Institute (TMI)	0.2	Grant	The project aims to improve the local population's ability to adapt to the consequences of climate change in two catchment areas in the Humla District. It will support capacity-building in climate-related issues among the user groups and improve erosion control for enhanced disaster prevention. The project will also rehabilitate 50 hectares of forest and restore and protect ten sources of drinking water.
Pakistan	Adaptation	Programme Supporting Biodiversity in Pakistan	01/2012–12/2015	GIZ	5.0	Grant	The programme supports the Government in promoting the protection and sustainable use of biological diversity and ecosystems in order to maintain and improve ecosystem services such as water and sustainable energy.
Peru	Adaptation	Adaptation of Public Investments to Climate Change	11/2011–10/2014	GIZ	3.0	Grant	Consideration of criteria for adaptation to climate change in public investment strategies.
Philippines	Adaptation	Protection and Restoration of Coastal Ecosystems for Improved Adaptation to Climate Change	03/2011–06/2014	GIZ	4.4	Grant	Protection and restoration of coastal ecosystems for improved adaptation to climate change in the Philippines and the Coral Triangle.
South Africa	Mitigation	Developing Climate Policy Capacity within the South African Department of Environmental Affairs	08/2011–06/2013	GIZ	1.5	Grant	This project will support the Ministry of Environment in the area of climate policy, specifically in capacity-building, policymaking and implementation. It will cover international climate negotiations, emission reduction analysis, sectoral policy implementation and adaptation measures.
Thailand	REDD+	Thailand Forest Carbon Baseline Development, Monitoring and REDD Capacity Building	08/2011–08/2014	World Wide Fund for Nature (WWF)	1.7	Grant	This project aims to create a cost-effective, high-resolution forest carbon basemap to serve as the Thai Government's inventory and put in place a credible and transparent carbon monitoring system for REDD+. Capacity-building and the development of a sub-national pilot project design document will contribute to Thailand's ability to develop and benefit from a range of new carbon financing mechanisms and to better understand how co-benefits are identified, measured and monitored.
Turkmenistan	REDD+	Sustainable Forest Management	06/2011–06/2012	GIZ	0.8	Grant	The project supports efforts to sustainably manage forest areas. It supports joint efforts to prepare and implement local forest management plans in mountainous regions and arid zones. The forest administration is being advised in its efforts to establish organisational structures, and its technical staff are being trained in how to set up and operate a system for monitoring GHG emissions and deforestation.
Ukraine	Mitigation	Climate Change Mitigation Focus in Economic Development in the Donetsk Region as a Model	05/2011–07/2015	GIZ	3.0	Grant	The project aims at providing a model of an industry's focus on climate change mitigation. It will implement model pilot measures that demonstrate how to realise a regional concept for reducing emissions through resource and energy efficiency.
Ukraine	Mitigation	Modernisation of Public Transport in Lviv – Phase II	01/2011–07/2013	European Bank for Reconstruction and Development (EBRD)	5.0	Grant	This project addresses the comprehensive modernisation and expansion of the public transport system in the city of Lviv in order to minimise the climate impact of both increased mobility and the 2012 European football championships. The aim is to reduce transport-related CO2 emissions through the use of modern, energy-efficient technologies and to reduce the number of private vehicles.
Ukraine	Mitigation	Capacity Building for Low Carbon Growth in Ukraine	09/2011–07/2013	UNDP*	2.5	Grant	The project aims to assist Ukraine in developing a long-term low-carbon development strategy, focusing on achieving economic growth and avoiding an increase in GHG emissions. It will utilise appropriate decision-making tools, which increases the Government's overall institutional capacity to design and implement climate change policies, and implement improved and adequate measures.
Global (Argentina, Brazil, Chile, Senegal, Turkey, Vietnam)	Mitigation	Initial Funding of Local Project Development Companies for Renewable Energy Projects in Developing Countries	09/2011–12/2012	KfW	2.5	Grant	The aim of the project is to assist in the start-up and financing for experienced local project developers that provide equity and/or shareholder-like loans to them. If the venture is successful and afore defined indicators are reached the capital flows back to the fund, if so including profit participation.
Global	Mitigation	Public-private Partnership (PPP) Programme for Climate Protection	07/2011–12/2013	Deutsche Investitions- und Entwicklungsgesellschaft GmbH (DEG)	2.0	Grant	The project aims to co-finance measures in the field of climate protection for preparing and supporting private investment on a public-private partnership (PPP) basis. Companies will receive support in technology/know-how transfer and capacity development/training.
Global	Mitigation	Innovative Tools to Lower the Entry Barriers and Allow for Scaling-up of Carbon Market Activities in Under-Represented Regions	01/2011–02/2014	The Gold Standard Foundation	2.3	Grant	The project will enable innovation and the institutional preparation in regions of the world that are currently under-represented in the carbon market, most notably LDCs*, LLDCs*, SIDS*, and poorer regions of developing countries. It aims at improving access to carbon finance for emission reduction projects by lowering entry barriers.
Global	Mitigation	Building MRV Standards and Capacity in Key Developing Economies	01/2011–12/2014	World Resources Institute (WRI)	4.0	Grant	The project aims at building the capacity of a set of countries to inform the design of international MRV guidelines and to implement them at the national level. It will define the features of a robust national MRV system, map current national and sectoral systems against those features, engage policymakers as well as the private sector and civil society in national stakeholder groups, and build capacity and support in key corporate sectors and civil society to adopt and implement the system.
Global	Mitigation	Stimulating Ambitious NAMAs* to Reduce GHGs in Developing Countries	01/2011–12/2013	Center for Clean Air Policy (CCAP)	1.9	Grant	This project aims to stimulate the development of NAMAs and contribute to the provision of fast-start finance for quick implementation. Regional peer-to-peer learning dialogues among developing countries in Latin America and Asia will involve different stakeholders that will work together to define actions for their countries and will undergo peer review and receive training. In-depth case studies of best practices and policy papers on key issues will be presented. CCAP will highlight opportunities for climate change mitigation policies developed by key country officials to support development goals such as poverty alleviation, energy security and health protection.
Global	Mitigation	Non-Renewable Biomass Fraction	11/2011–04/2013	Perspectives GmbH	0.2	Grant	Goal of this project is to support the implementation of CDM* projects in Africa with baseline scenarios that are based on the use of non-renewable biomass.
Global	Mitigation	Foundation "Future of the Carbon Market"	2011	KfW	10.0	Grant	The foundation aims to provide start-up funds for supplying certificates from programmes of activities (PoAs). The funds are intended to finance the development, implementation and start-up costs of CDM and joint implementation PoAs, as well as the development of a corresponding portfolio.
Global	Mitigation	Enhancing Low-Carbon Development by Greening the Economy: Policy Dialogue, Advisory Services, Benchmarking	09/2011–07/2014	GIZ	3.0	Grant	The project will promote a green economy in developing countries and emerging economies as a realistic approach towards low-carbon development. It includes the preparation of concept papers, the establishment and testing of indicators, and benchmarking methods (supporting MRV) as part of demand-oriented advisory services in selected partner countries. It will support decision-makers in designing suitable policies for a transition to a green economy.
Global	Mitigation	Analytical Support for the Creation and Operation of the Registry for Recording NAMAs and Facilitating Matching of Support	06/2011–12/2012	Ecofys	0.3	Grant	This project will provide public analytical support for the development and operation of an on-line registry for NAMAs. It will accelerate the implementation of the registry and help reaching international agreement on its modalities.
Global	Mitigation	Global Ideas – Jointly for Climate Protection	06/2011–06/2013	Deutsche Welle TV	3.0	Grant	Goal of this project is to enhance visibility of climate projects in developing and transition countries.
Global	Mitigation	Pilot Testing of Global Bioenergy Partnership (GBEP) Criteria and Indicators for Sustainable Bioenergy in Targeted Developing Countries	07/2011–04/2012	FAO*	0.6	Grant	The project intends to build capacity in measuring Global Bioenergy Partnership (GBEP) sustainability indicators for bioenergy in Indonesia and Colombia to help governments monitor the environmental, social and economic impacts of their bioenergy production, and develop sound policy for sustainable bioenergy development.
Global	Mitigation	Clean Technology Fund (CTF)	2011	World Bank	125.0	Loan	The CTF is part of the CIF* and finances scaled-up demonstration, deployment and transfer of low carbon technologies.
Global (Bangladesh, Dominican Republic, Kenya, Maldives, Mexico, Peru)	REDD+	Strengthening Transparency, Accountability, Anticorruption and Public Oversight in Climate Governance and Finance for Adaptation, Mitigation, REDD+ and Climate-Friendly Economies	03/2011–04/2013	Transparency International (TI)	2.5	Grant	The project intends to improve control of international climate funding on a pilot basis, through targeted capacity-building among all actors.
Global (Brazil, Congo Basin)	REDD+	REDD+ Policy Assessment Center (REDD+PAC)	11/2011–11/2015	International Institute for Applied Systems Analysis (IIASA)	4.5	Grant	The project will apply integrated land-use modelling to support the design of globally consistent national and regional REDD+ policies that safeguard and enhance other ecosystem values. It supports high-resolution planning for REDD+ and the Convention on Biological Diversity (CBD) in the Congo basin and Brazil. The REDD+ Policy Support Center will act as a global forum for sharing and improving global data on forests and deforestation drivers and developing best practices on national REDD+ modelling, thereby supporting bilateral and multilateral efforts to ensure transparency as well as environmental and financial integrity of REDD+ efforts.
Global (Ghana, Mexico)	REDD+	Assessing and Capitalizing on the Potential to Enhance Forest Carbon Sinks through Forest Landscape Restoration while Benefiting Biodiversity	02/2011–08/2012	International Union for Conservation of Nature (IUCN)	0.6	Grant	This project will provide analytical work, practical tools and methodologies, as well as an open platform for assessing the restoration and climate change mitigation opportunities. This shall be used as a basis to support the participatory development of REDD+ strategies. The capacity-building of institutions from additional countries ensure the broad uptake of the approaches and outputs.
Global	REDD+	Forest Carbon Partnership Facility (FCPF)	2011	World Bank	9.0	Grant	FCPF assists developing countries in their efforts to reduce REDD by providing value to standing forests.
Global	REDD+	Independent Network for REDD+ Funds Tracking	11/2011–11/2015	Forest Trends Association	1.9	Grant	The project will establish a global network to track and analyse public and private REDD+ fund expenditures, focusing on the specific use of funds in recipient countries. Local institutions from priority REDD+ regions will receive support and training to track REDD+ finance. The findings will be presented in an online database and annual analytical report.
Global	REDD+	Advisory Project "International Forest Policy" (IWP)	05/2011–12/2013	GIZ	3.6	Grant	The project provides advisory services for the further development and application of international forestry policies from a development policy perspective and supports the integration of forestry-related issues, such as sustainable forest management, climate change mitigation and adaptation, REDD+ and capacity development, into German development cooperation. It cooperates closely with projects and programmes in partner countries on the formulation of national policies, forest governance, climate protection, financing issues as well as forestry standards and sustainable use.
Global (Brazil, Philippines, South Africa)	Adaptation	EbA in Marine, Terrestrial and Coastal Regions as a Means of Improving Livelihoods, Conserving Biodiversity and Adapting to Climate Change	05/2011–07/2015	Conservation International Foundation	4.4	Grant	The project will assess the vulnerability and the potential for EbA solutions in three very diverse settings. It will implement the pilot solutions and carry out capacity-building. These activities shall serve as a model for the amplification of EbA in marine and terrestrial settings in other areas and countries.
Global (Indonesia, Mexico, Philippines, Tunisia)	Adaptation	Inventory of Methods for Climate Adaptation	04/2011–05/2013	GIZ	2.5	Grant	The project aims to support decision-makers with a proven inventory of methods for the identification, analysis and prioritisation of adaptation needs and measures. It will support the management of climate-related data and promote the creation of a network for South-South exchange between actors in the area of adaptation.
Global	Adaptation	Pilot Programme for Climate Resilience (PPCR)	2011	World Bank	12.0	Grant	The programme is part of the Strategic Climate Fund (SCF), a multi-donor Trust Fund within the CIF*. It's objective is to provide incentives for scaled-up action and transformational change in integrating climate resilience in national development planning consistent with poverty reduction and sustainable development goals.
Global	Adaptation	Special Climate Change Fund (SCCF)	2011	GEF*	23.0	Grant	The Fund supports activities and programmes in adaptation to climate change, technology transfer, energy, transport, industry, and waste management, among other things, in developing countries.
Global	Adaptation	Least Developed Countries Fund (LDCF)	2011	GEF	45.0	Grant	The LDCF was established under the UNFCCC* and aims to address the special needs of the LDCs, which are especially vulnerable to the adverse impacts of climate change. This includes preparing and implementing National Adaptation Programmes of Actions (NAPAs).
Global	Adaptation	Placement of Technical Experts for Capacity Building in Climate-Related Areas	01/2011–12/2013	GIZ	1.6	Grant	Placement of technical experts for capacity building in climate-related areas.
Global	Adaptation	Programme Implementing the UN Convention on Biological Diversity (CBD)	01/2012–03/2015	GIZ	2.3	Grant	The programme provides advisory services for the further development and implementation of international and national biodiversity policies from a sustainable development perspective, and supports the integration of biodiversity-related objectives and activities into projects and programmes in partner countries. It also further develops capacity-building tools as well as supports partner countries and organisations in developing access and benefit sharing regulations and approaches for the benefit of local communities and the conservation of biodiversity.
Global	Adaptation	Survive: Science and Policy to Assist and Support SIDS and LDCs to Negotiate a Strong International Climate Regime Enabling Low Carbon Development and Supporting Adaptation Needs	09/2011–08/2014	Potsdam-Institut für Klimafolgenforschung (PIK) e.V.	4.0	Grant	The goal of this project is to provide strategic, technical, policy and scientific support to SIDS and LDCs to assist them in achieving their objective of a legally binding, ambitious and comprehensive international climate regime. This includes the setup of the Green Climate Fund, further work on long-term finance, advancing work on a loss and damage mechanism, the setup of the Adaptation and Technology Committees, the review of the 1.5 °C issue, and the review of mitigation commitments, pledges and actions noted in the Cancun Agreements.

**total commitments 2011** **497.1** (planned 433)

**For 2010 and 2011, Germany provided a total of 858.6 million euros for fast start activities. For 2012, an additional 471 million euros are planned.**

<p>* CDM Clean Development Mechanism          CIF Climate Investment Funds          EbA Ecosystem-based Adaptation          FAO Food and Agriculture Organization of the United Nations          GEF Global Environment Facility          GHG Greenhouse Gas          GIZ Deutsche Gesellschaft für Internationale Zusammenarbeit          KfW KfW Bankengruppe</p>	<p>LDCs Least Developed Countries          LLDCs Land-locked Developing Countries          MENA Middle East and North Africa          MRV Measurement, Reporting and Verification          NAMAs Nationally Appropriate Mitigation Actions          REDD Reducing Emissions from Deforestation and Forest Degradation          SADC Southern African Development Community</p>	<p>SIDS Small Island Developing States          UNDP United Nations Development Programme          UNFCCC United Nations Framework Convention on Climate Change</p>
